652mm

450mm

display area	640mmX1920mm
Box weight	Stand model: 23.5kg (without kit and power supply)
	Base model: 35.3Kg (without kit and power supply)
material	Iron + Aluminum
Number of kits per box	24 modules per case
Installation	Rack or base mounting
color	Black (customized)
operating environment	interior

Batch can be customized size

Intelligent and convenient operation management

You can use mobile phone/computer/WIFI/U disk control to install the background release software, through the background of the remote release to the LED poster screen, through the remote release of pictures, video, text scrolling and so on.

work out the difference

Too many terminals to manage

Frequent changes to advertisements

Publish remotely anytime, anywhere

APP Management System

Backend publishing software is easy to use and portable

Intelligent Management APP

Easy uploading of content using mobile phone/computer/WIFI/U disk control for unified playback and management

USB flash drive

laptops

cell phone

High-quality "chips"

Each function has a separate chip to ensure that the product meets the performance requirements.
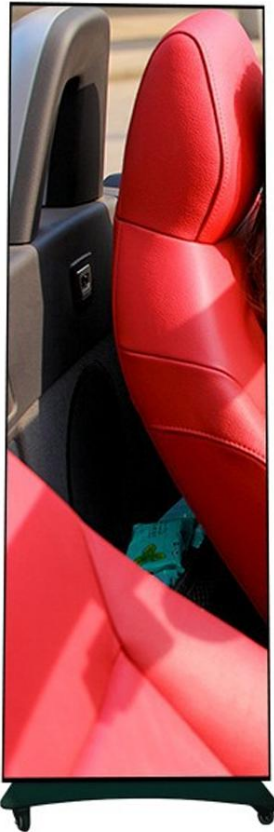

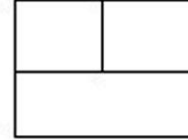

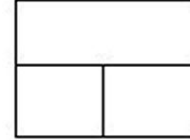

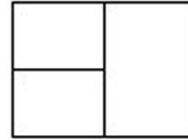

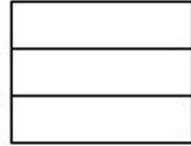

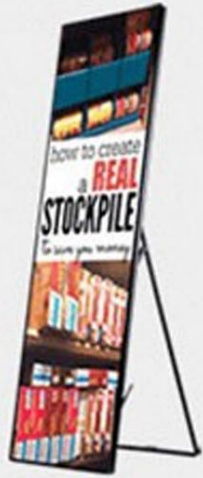

Imported Chips

Intelligent Protection

Split screen playback Seamless splicing

The same screen multi-screen split mode playback split-screen mode, using the management APP can simultaneously control multiple screens at the same time, mirror mode can use the management APP can simultaneously control multiple screens at the same time, play the same content.

resting on one's back

Creative Installation

Standing installation

Hanging installation

Multi-screen cascade

Multiple mounting options

A variety of installation methods can be adapted to the needs of your various places to support hanging, wall mounting, seat mounting, diagonal brace mounting, and other installation methods.
